

COVER LETTER

JOÃO DUARTE PINTO

Hi!

I am a Software Developer, who loves what he does and wants to develop his knowledge! I just finished a postgraduate degree in Software Development at Instituto Superior de Engenharia do Porto.

What brought me here

I'm M.Sc. in Physiotherapy from Escola Superior de Saúde do Porto and during my academic and professional career as a Physiotherapist, I was part of a Primeira Liga team, I was coordinator of the Department of Youth Physiotherapy, I worked in a private office, I did several presentations and published a scientific article.

The Change

The change to the IT area arose from my interest, and from my personal and professional goal to work in Software Development. The interest appeared over the years, in which I personally carried out some projects. So I decided it was time to make a big change in my life, completely leave Physiotherapy and enter a postgraduate course in Software Development, chasing my dream!

Future

My future goals is to acquire more knowledge and experience, in order to increase my competence, as I believe that only with constant and quality learning can we differentiate ourselves as professionals.

I hope we can talk soon,

João Duarte Pinto
